DÄMMGULAST®  
vibration control lining

### Single Bossed Clamp-Junior

- High stiffness due to reinforcing bead
- Tightening bolts with combination cross-head convenient for power driver
- Size min. 12 mm to max. 6"
- Load min. 700 N up to 2,500 N

DÄMMGULAST®  
vibration control lining

### Single Bossed Clamps - Heavy Duty

- Suitable for fixings in industrial areas
- Stronger tightening bolts for high load capacity
- Size min. 1½" to max. 355 mm
- Load min. 4,166 N up to 8,333 N

DÄMMGULAST®  
vibration control lining

### OPTIMAL Junior®

- Practical latching fastener
- Easy clicking-in of the fastening bolt with the tip of a finger
- High security due to the positive-fit edge hook-in opening
- Size min. 12 mm to max. 4"
- Load min. 400 N up to 1,000 N

Vibration control lining

### EURO-QUICK Type J

- With highly elastic insert
- Captive fastening screws with captive washer
- Safe handling thanks to rounded flange
- Size min. ¼" to max. 12"
- Load min. 1,200 N up to 2,700 N

## Support Channels: Selected Products

**MPC-Support channels** are a **quick and efficient** attachment of pipe sections and multiple pipe ways. The scale marks sideways and on the side with the slot **simplify the alignment of the attachment elements** during installation and **facilitate the measuring and cutting** to length of the section on site.

**MPC-Support Channels 27/18**  
Sizes: 1 m/2 m/6 m

**MPC-Support Channels 38/80**  
Sizes: 2 m/4 m/6,64 m

**MPC-Support Channels 38/40**  
Sizes: 2 m/3,04 m/6 m

**MPC-Support Channels 40/60**  
Sizes: 2 m/3,04 m/6 m

### Surface Protection

Available in **stainless steel A2 and A4**, **strip galvanised**, **hotdip galvanised** and **MÜPROtect®** for a variety of installation conditions, such as in **outdoor applications**, in **industrial atmospheres** or in **sewage treatment plant building**.

## Take a Look at our Extensive Product Portfolio

**We offer professional solutions for every application.**

From **pipe clamps** to **tools**, we will provide you with support at every stage of your project with comprehensive guidance and rapid implementation.

Specially developed by **MÜPRO**, the **MÜPRO support channel system** can be used to install pipelines and air ducts ranging from light, medium to heavy loads.

Our range of **pipe clamps** provides the perfect solution for every type of application, independently of the type of pipeline system.

Pipe **anchor/expansion points** from **MÜPRO** are specially designed to absorb large compression forces and to ensure excellent force transmission. They are easy to install, versatile in their types of use.

Wide range of **accessories** for an easy and quick installation in many application fields including standard-compliant threaded items, washers, nuts and a variety of small and customised parts.

Visit our **online-shop** and take a look at our further product range:

### STATO® Brackets

- Ideal pipe anchor point in combination with STATO® Clamps without lining
- Ideal as height adjustable subframe for anchor and expansion assemblies
- Continuously adjustable in height and slope
- Especially suitable for heavy pipes with large wall clearances

### Slide Guides 1,75 kN

- Attachment of pipes with temperature affected, axial expansion
- A variety of installation possibilities (floor-mount, ceiling-mount, wallmount)
- Expansion point attachment for standing and suspended pipes and as cross connection for pipe movement in axial and lateral directions

fire protection  
certified  
≥ M 10

### Swivel Hangers

- Attachment solution for suspended pipes allows axial and lateral pipe movements
- Attachment of pipes with thermal, axial expansion
- Especially suitable for large ceiling distances
- 360° degree of freedom and large deflection from the vertical

fire protection  
certified  
M 10 - M 12

### Sliding Stirrups

- Expansion point attachment for suspended pipes
- Attachment of pipes with thermal, axial expansion
- Prevents any force build-up at the attachment point in case of changes in pipe length
- If mounted reciprocally, an axial synchronous ganging of the pipes is ensured

fire protection  
certified  
M 10

### Girder Clamps

- For flexible attachment of hangers on inclined girders and flanges
- Rotatable about 360°
- Approved by FM and VdS for the suspension of sprinkler lines from girders inclined at an angle of up to 25°

VdS

### Girder Cleats

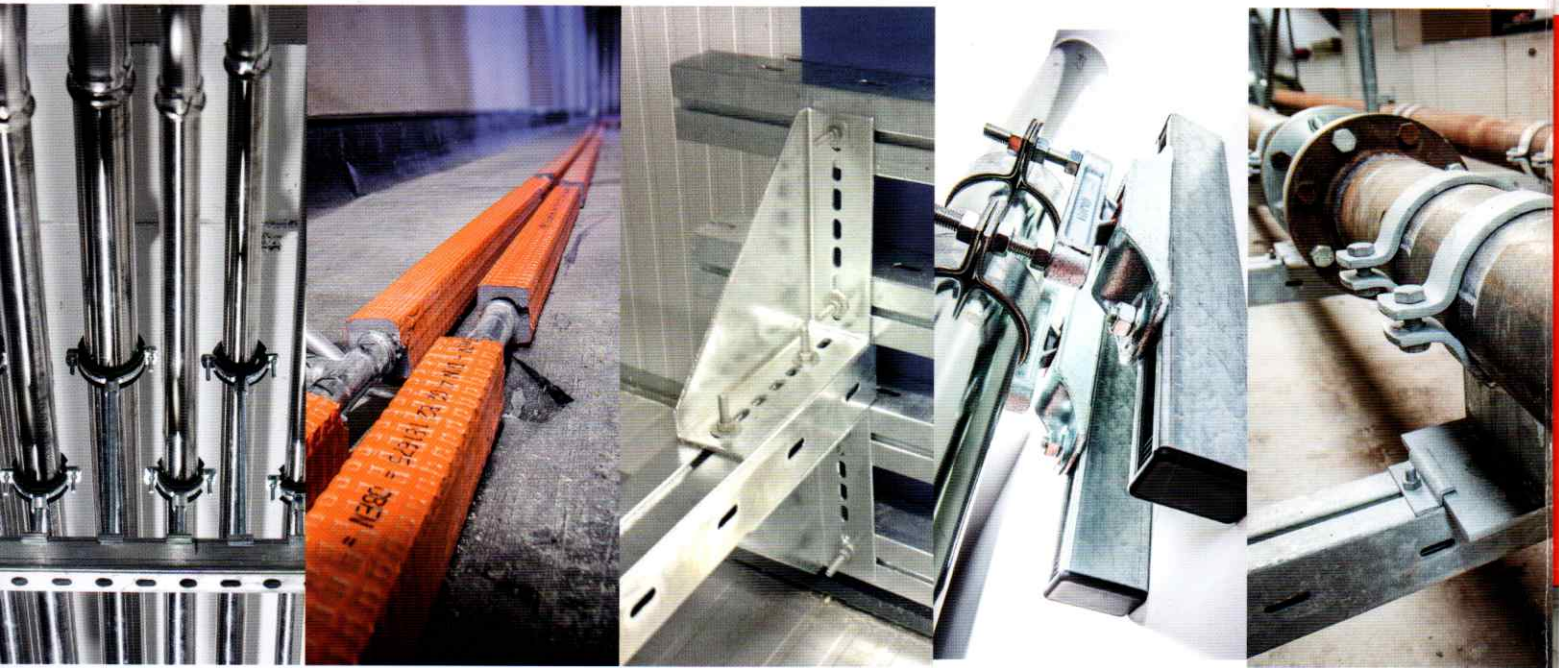

- Attachment of MPC-Support channels to steel girders without drilling or welding
- Easy to install, pre-assembled kit
- Approved by VdS if used with thread M8 or M10 for profiles 38/40 or 40/60

VdS

## Our mission is to satisfy our customers

Our customers are at the heart of everything we do. We want to create real added value for them based on sophisticated, high-grade products and provide them with the best possible support for their projects.

### Our brand

Leader in support systems and vibration control technology for over 50 years

### Our values

Respect, trust and a sense of responsibility: a business culture based on partnerships

### Strategy

We focus on quality, speed and reliability to ensure benefit for our customers, suppliers and partners

## Technical consulting

Our support technology solutions are tailored to your needs. Expert consultants give comprehensive support for your projects; with related calculations, supporting documents, drawings and order proposals.

## On-site supervision

Our consultants support you direct on-site and develop individual solutions according to your construction requirements.
